### 3. Approval of Scheme of Study for BE Programs for AY 2025-26 - Even Semester

#### General Scheme for 8<sup>th</sup> Semester of 2022-26 Batch Scheme

**Elucidation:**

At the beginning of IV years of the program i.e., after VI semester, VII semester classwork and VIII semester Internship shall be permitted to be operated simultaneously by the University so that students have ample opportunity for an internship. In other words, a good percentage of the class shall attend VII semester classwork and a similar percentage of others shall attend to Internship.

**Internship:** The mandatory Internship is for **14 to 20 weeks**. The internship shall be considered as a head of passing and shall be considered for the award of a degree. Those, who do not take up/complete the internship shall be declared to fail and shall have to complete it during the subsequent SEE examination after satisfying the internship requirements. If the students are opting for the 8th semester, the following internship options are available:

- Industry Internship
- Research Internship
- Skill Enhancement Courses
- Post-Placement Training as Internship
- Online Internship

**Industry internship:** It is an extended period of work experience undertaken by students to supplement their degree for professional development. It also helps them learn to overcome unexpected obstacles and successfully navigate organizations, perspectives, and cultures. Dealing with contingencies helps students recognize, appreciate, and adapt to organizational realities by tempering their knowledge with practical constraints. Students undertaking industry internships must ensure the organization is listed on the VTU Internship Portal. If not, request the organization to register on the portal.

**Research internship:** A research internship is intended to offer the flavor of current research going on in the research field. It helps students get familiarized with the field and imparts the skill required for carrying out research. Research internships must be carried out in recognized research centers. Ensure that these centers are registered on the portal.

**Skill Enhancement Courses:** Students can take Skill-based courses with credits totalling the same as those of the internship. Students must be taken from registered providers listed on the VTU Internship Portal.

**Post-Placement Training as Internship:** The post-placement training is also considered an internship. For students placed during their 6th/7th semester and willing to take the training during their final year, colleges must inform the recruiting companies in advance to register on the VTU Internship Portal.

**Online Internship:** Reputed online internship platforms, including those identified by NSDC, are already listed on the VTU Internship portal. If colleges come across other eligible organizations not yet listed, they are informed to ask the organization to register on the VTU Internship portal.

The faculty coordinator or mentor has to monitor the student's internship progress and interact with them to guide for the successful completion of the internship. The students are permitted to carry out the internship anywhere in India or abroad. University shall not bear any expenses incurred in respect of the internship. With the consent of the internal guide and Principal of the Institution, students shall be allowed to carry out the internship at their hometown (within or outside the state or abroad), provided favorable facilities are available for the internship and the student remains regularly in contact with the internal guide.

### Key areas of focus

- ❖ Industrial oriented training for students of core branches
- ❖ Fundamentals & independent (non-AI) programming capabilities to be improved
- ❖ The application of programming knowledge and concepts needs further improvement. Student-driven coding clubs should be more active to motivate learners and increase the number of internal coding activities conducted each semester.
- ❖ Left shift academics to enable Open Elective subjects to be offered from 4<sup>th</sup> Semester onwards
- ❖ Students to actively involve in project - based activities beyond curriculum.
- ❖ Industry-mentored mini projects and capstone pathways to be introduced from early semesters, enabling students to solve real-world problems and gain exposure to professional workflows.
- ❖ Outcome-based, skill specific global certifications (coding, design, simulation, manufacturing tools, etc.) to be embedded into the program, ensuring measurable competency beyond course completion.
