

REPORT ON BLOOD DONATION CAMP

The Leo Club of NHCE, in collaboration with the Lions Club (Blood Centre BLST), successfully organised a blood donation camp on 24th March 2026 at the Library Reading Hall, Amar Jawan Block. The event reflected a strong spirit of service and humanitarian commitment among students.

The camp witnessed an overwhelming response, with 283 students voluntarily donating blood in support of this life-saving cause. The drive concluded at 5:00 PM, marking a significant achievement not only in terms of participation but also in raising awareness about the importance of blood donation.

Beyond the remarkable number of donors, the initiative played a vital role in educating students about the need for regular blood donation and its impact on saving lives. Many first-time donors expressed a deep sense of satisfaction and pledged to continue contributing to such noble causes in the future.

All collected blood units were handed over to the Lions Blood Bank to ensure timely assistance to patients in need. The success of the drive highlighted the strong sense of social responsibility, unity, and compassion among the student community, reaffirming the club's dedication to meaningful social service.

Additionally, the event served as an effective platform to spread awareness about health, wellness, and the scientific aspects of blood donation. It helped dispel common myths and encouraged greater participation in similar initiatives.

The organising team of the Leo Club deserves special appreciation for their excellent coordination and tireless efforts in ensuring the smooth execution of the event. This blood donation camp has set a benchmark for future initiatives, demonstrating the power of collective action in building a healthier and more compassionate society.
