Only use and throw bottles were manufactured here. The process of manufacturing was briefly explained to the students. The students were then taken to the packing plant and learnt about different ways of packaging water. They also visited the unit where the filling, labelling and packaging of the bottles took place.

As a result of this visit, students were able to understand advantages of ozone treatment on water. They became familiar with various marketing skills involved in promoting water. They also saw the importance of rain water harvesting. And acquired reasonable knowledge regarding the working of a packaged drinking water plant.

Faculty Development Programme on "Deep Learning with TensorFlow"

The FDP was conducted with an agenda for making faculty participants integrate the latest technology into teaching, learning, research. A total of 31 faculty participants from different engineering colleges from different states participated in this programme.

The morning session started with a traditional lamp lighting ceremony followed by the welcome address delivered by Dr. Asha, Head, Department of MCA.

The afternoon session started with an introduction to machine learning and deep learning by the resource person Prof. Govindaraj Venugopal. A hands-on with Google's TensorFlow product was done with all the different libraries that are used for machine learning and deep learning. The event came to an end with the valedictory function, which included certificate distribution to all the faculty participants. Dr. K.G. Madhwaraj, Professor proposed the vote of thanks.
