Targeted Audience: Students from EEE, CSE, ISE, PG students and Faculty members.

Description of the Event: On December 21, 2023, the Innovation Club organized a special talk at Tejas Seminar Hall about "Innovation and Dynamic Learning." Over 100 students attended, and the speaker was Dr. Chinnu Nallathambi, Co-Founder of Brain Magic Academy and a WHO-endorsed Life Skill Trainer.

What made this talk unique was that Dr. Nallathambi didn't use regular slides. Instead, he created an interactive atmosphere where students could actively participate. He spoke passionately about the untapped potential in each person, highlighting that realizing this potential opens up amazing possibilities.

Dr. Nallathambi passionately discussed how understanding and harnessing the power of the subconscious mind can be directly linked to fostering innovation. He explained how our subconscious mind, often operating beneath our conscious awareness, plays a crucial role in shaping our thoughts, ideas, and problem-solving abilities. By exploring the depths of the subconscious, attendees gained insights into how it can be a wellspring of creativity and innovation.

The absence of traditional slides made the session engaging, encouraging students to share their thoughts openly. Dr. Nallathambi's message was clear – everyone has incredible abilities within them. The talk wasn't just a lecture; it was an exciting journey into the power of human potential and the importance of a supportive learning environment.

In the end, students left inspired, ready to embrace their own abilities, and face challenges with a positive and adaptable mindset. The event showcased the Innovation Club's dedication to promoting a dynamic learning culture, making it a memorable and impactful experience for all.
