Description of the Event:

Mindspark event was organized in such as way that the participants would gain knowledge in mobile app designing and also in coding and would gain insights in problem solving .

This event consisted of 3 rounds : WikiWhiz , UI Clash , CodeMaze

WikiWhiz

In this round students where given 2 starts , they had to search for the first word and open its Wikipedia page and using the hyperlinks from that page they had to reach the wiki page of the second word.This was done to enhance their critical thinking and time management skills as they were given only 15 min of time.

UI Clash

In UI Clash each team was asked to design a page for an app , they were asked to design a basic login and registration page using figma . It was evaluated based on how well participants understand design principles , utilize the design tools , and address potential user needs and pain points.

CodeMaze

Embark on an exhilarating adventure that seamlessly blends the thrill of a treasure hunt with the cunning challenges of an escape room in our unique hybrid round! Participants were navigated through a series of clues, puzzles, and code snippets, solving riddles to unlock the path to their ultimate goal. Time is of the essence as teams collaborate, think on their feet, and race against the clock to uncover the treasure and escape the room. It was an immersive experience that tested both their problem-solving prowess and teamwork skills!
