

NEW HORIZON COLLEGE OF ENGINEERING

REPORT ON STEM CELL DRIVE

The NSS Club of New Horizon College of Engineering successfully organized a stem cell transplantation awareness session and registration drive held on **February 2, 2024**. A notable achievement was the registration of approximately 200 students as potential donors, underscoring the profound impact and engagement garnered by the event. Facilitated by the esteemed presence of the DKMS-BMST Foundation India, the awareness session proved instrumental in educating attendees about the critical importance of stem cell donation and transplantation in combating various life-threatening diseases.

It served as a platform for participants to gain comprehensive insights into the donation process, its implications, and the significant role each potential donor plays in saving lives. DKMS BMST Foundation India's expertise and commitment were evident as they not only delivered an informative discourse but also efficiently managed the registration process.

The attendees actively engaged with the informative sessions, demonstrating a genuine interest in contributing to this noble cause. The decision to register as potential donors reflects a collective commitment to altruism and community welfare among the student body.

The seamless coordination and execution of the awareness session and registration drive underscore the collaborative efforts of the organizers, volunteers, and DKMS BMST Foundation India. By fostering awareness and facilitating registrations, the initiative has not only expanded the pool of potential donors but has also instilled a sense of responsibility and compassion among the student community towards those in need of life-saving stem cell transplants.
