

# NEW HORIZON COLLEGE OF ENGINEERING

## VOTER ID REGISTRATION DRIVE

New Horizon College of Engineering, in collaboration with the Alumni Club, successfully organized a Voter ID registration drive from February 8th to 10th, 2024, at the NHCE Campus. The drive was aimed at making the process of acquiring voter IDs seamless for the students and staff members, especially the young and eligible voters.

The special registration drive for new voters enabled them to obtain their voter IDs without any hassles. The names of all the new voters were enrolled, and guidance was provided on linking their Aadhaar number and voter ID card. The drive helped around 200+ students and staff members with various voter ID facilities, such as new voter registration and updating of voter details.

The registration drive was implemented to ensure that every eligible individual can actively participate in the affairs of democracy without being deprived of their right to vote. Having a Voter ID is essential as it enables every member of society to fulfill their national duty and participate in the democratic process.

We hope that such initiatives will continue in the future, and more people will be encouraged to enroll themselves as voters, ensuring a strong and vibrant democracy.
