Targeted Audience: Students from CSE, ISE, ECE, EEE, MECH

Description of the Event:

On May 17, 2024, the Aerobots student club hosted an exciting event called "CrossConnectionzz," which drew enthusiastic participation and positive feedback. The event was structured into three major rounds. The first round challenged participants to solve a crossword puzzle with questions centered on aerial vehicles and electronics, testing their knowledge and quick thinking. In the second round, a buzzer quiz added a competitive edge, as teams raced to press the buzzer and answer questions displayed on a screen, with points awarded to the quickest and most accurate responses. The final round focused on practical skills, requiring teams to design five different circuits. Points were given based on how quickly and accurately each team completed the task. All the points from these rounds were totaled to determine the winners of the competition. Overall, "CrossConnectionzz" was a huge success, garnering enthusiastic praise from participants who expressed a keen interest in having similar events soon.
