Jahnvi Parmar – PROGRAM COMMITTEE CHAIR

Shimmi Sahu – PROGRAM COMMITTEE VICE CHAIR

Tiba Sidra- PROJECT COMMITTEE CHAIR

Keerthana Y-PROJECT COMMITTEE VICE CHAIR

Gnanesh H Nayak – REVIEW COMITEE CHAIR

Total Number of Participants: 160

Targeted Audience: Students from ECE, CSE, ISE, CE, DS, AIML, EEE AND ME Department

Description of the Event:

On the 14th of May 2024, the Emsys Nex Gen Club at New Horizon College of Engineering hosted “Career Odyssey”. Over 160 students from various branches and all years enrolled, showcasing their enthusiasm and unwavering thirst for knowledge. The event consisted of an insightful seminar and an interactive treasure hunt.

The seminar was delivered the guest speaker, “Ms. Himanshi Sehgal” a Software Development Engineer at Walmart. She started off the event speaking about her college days. She recounted her experience upon not getting placed through college and the worries that it bought along. She spoke about how she overcame those worries and worked towards gaining more real-world technical experience, and how that benefitted her in the long run. Her talk was extremely enlightening, educating students about the importance of internships, dealing with failure and what areas students can focus on to improve themselves. She highlighted the value of continuous learning and how one must practice for that is what makes perfect. She ended her seminar with informing students about various platforms and resources that she herself used and still continues to do so. The students were also given the opportunity to ask questions and get one on one advice from the esteemed speaker.

After the educational seminar, students were invited to take part in a treasure hunt. The treasure hunt deviated from the usual rules, adding a creative modern twist. The event consisted of 4 rounds starting off with students being given general brain teasing aptitude questions. They were given a time limit and were judged on speed and accuracy. As the rounds progressed, the complexity of the questions were increased. Ten teams qualified and made it to the final round.

In the final round, Students were given a riddle and a QR code to scan. The QR code took them to famous locations throughout the college. Participants followed the digital trail across campus, sorting amongst fake codes to find the real ones. They were finally led to the last location which was common for all teams. The first three teams to decode the trail and reach the final destination were declared the winners and were given exciting certificates.

Career Odyssey proved to be a resounding success, eliciting enthusiastic responses from students across diverse departments. It seamlessly blended education with entertainment, imparting valuable knowledge while ensuring participants had a great time. Participants left with a gratifying sense of accomplishment, having both enriched their understanding and enjoyed themselves thoroughly.
