Description of the Event:

The FOSS CLUB and GEC CLUB are pleased to announce the successful completion of an event featuring an outreach program at the Government Higher Primary School, Ibbaluru..

In the outreach program “UNLOCKING POTENTIAL”, the students of FOSS club and GEC club interacted with the students of the Government Higher Primary School, Ibbaluru. The students of 3rd to 7th standard were given a brief idea about computer software such as Blender and Scratch. The students enjoyed the animations and models created by the members of the FOSS club.

The students were also given a brief idea about the nature and renewable sources of energy from the students of the GEC club. The students conducted various games and activities which were aimed to help inculcate learning in the young student minds.

We extend our sincere gratitude to all participants for their active engagement and enthusiastic participation. Their dedication significantly contributed to the success of the event.
