The Feedback Mechanism page in Contineo LMS is designed to collect valuable input from students, enhancing the learning experience. Through this page, students can provide feedback on course content, teaching effectiveness, and overall learning environment. Instructors can also use the page to receive constructive insights on their teaching methods. The system allows for both anonymous and structured feedback forms, making it easy to gather responses and analyse data. This feature helps institutions continuously improve course delivery, identify areas for improvement, and ensure that student needs are met, fostering an ongoing cycle of feedback and improvement.
