The Student Progress Tracker in Contineo LMS offers a comprehensive way to monitor and evaluate student performance throughout a course. It provides detailed insights into individual student progress, tracking key metrics such as completed assignments, quiz scores, attendance, and overall grades. This feature helps instructors identify areas where students may need additional support and allows students to self-assess their performance. The tracker also offers visual representations, such as progress bars and graphs, making it easy to track improvement over time. By offering real-time feedback and detailed performance data, the Student Progress Tracker ensures that both students and instructors can stay on top of learning goals and achievements.
