

Report on Cleanliness Drive at Jakkur Lake

The Department of Electrical and Electronics Engineering, in collaboration with the IEEE Student Branch, IEEE TEC, and the Green Energy Club members, organized a **Cleanliness Drive at Jakkur Lake** on **30th September 2025** from **1:00 PM onwards**. Student volunteers and members of the associated societies actively participated in the initiative, contributing to environmental conservation and community welfare.

Activities Conducted:

- Cleaning the surroundings of Jakkur Lake.
- Collecting plastic waste and other non-biodegradable materials.
- Spreading awareness about sustainable waste management practices.

The drive served as a practical learning experience, emphasizing the importance of individual and collective responsibility in maintaining environmental cleanliness. The primary objective was to instill awareness about hygiene, sanitation, and environmental sustainability among students and the local community. It also aimed to promote active involvement in the Swachh Bharat Abhiyan by preserving public spaces—particularly Jakkur Lake—and fostering eco-friendly practices for a cleaner, healthier future.

Key Takeaways:

1. **Hands-on Community Service:** Students gained real-world experience by contributing to public welfare through active participation.
2. **Awareness Creation:** The event highlighted the harmful effects of littering and plastic pollution on water bodies and ecosystems.
3. **Environmental Responsibility:** Reinforced the importance of adopting sustainable habits such as waste segregation and recycling.
4. **Teamwork and Leadership:** The collaborative efforts of students and faculty demonstrated the impact of teamwork, discipline, and civic responsibility.

Impact:

The cleanliness drive made a visible difference in the surroundings of Jakkur Lake, setting a positive example for the local community. It not only enhanced the aesthetic and environmental quality of the area but also instilled a sense of pride and responsibility among participants. The initiative strengthened the culture of sustainability within the institution and aligned with the national vision of a Clean India.

Conclusion:

The Swachh Bharat Abhiyan Cleanliness Drive at Jakkur Lake was a resounding success, effectively combining student engagement with social responsibility. The enthusiastic participation of students and faculty reflected the institution's commitment to environmental preservation. The event demonstrated that small, consistent actions can collectively create meaningful change. It reaffirmed that cleanliness and sustainability are not just government-led initiatives but shared responsibilities of every citizen.
